

## OBEL AWARD INTERNATIONAL TEACHING FELLOSHIPS

### KEY INFORMATION

The aim of the **OBEL AWARD Teaching Fellowships** is to bring the professional and academic realms closer together by enhancing the debate and learnings of the themes of the award. These themes reflect pressing issues and express the potential of architecture and design to positively impact our built environment.

The purpose of the fellowships – three designated for the inaugural cycle, one each in Latin America, South and Southeast Asia, and Africa – will support the teaching of a new course or courses within an official program at an accredited academic institution.

Illustrating the goal of bringing new voices into academia, the applications must be submitted jointly with the individual who will teach the course(s) and the host institution, thus showing dedication to and support of the objectives of the Obel Award Teaching Fellowship.

**The following fellowship goals should be considered:**

- To encourage curiosity in students about the major issues facing architecture as reflected in the themes of the Obel Award.
- To assist academic institution in creating relevant and impactful content and pedagogies.
- To seek to create a community/network around the Obel Award themes.
- To bring the professional and academic realms closer together through collaboration and the Fellowships
- To provide an opportunity for professionals to take time off from regular duties to teach and share their knowledge and experience.
- To provide opportunities for universities to explore new themes and include new voices on their faculty.

Ideally, the institution should offer a minimum of two subjects within the fellowship period in accredited university programs. However, other models of learning, could mean that only one more intensive subject is taught and therefore eligible for a fellowship.

For the 2023 edition, the joint application from a university (faculty, school, or department) and the teaching fellow must be related to one of the themes of the OBEL AWARD:

- Well-being through architecture.
- Seminal solutions to the challenges facing cities.

### APPLICATION INSTRUCTIONS

An application should be submitted *in English in one PDF file* (clearly labeled with potential fellow's last name and country). The application should strive to be clear and concise. Excessive supplemental materials, or long texts that go beyond the guidelines will not be taken into consideration.

#### Calendar 2023

**1 April 2023:** Fellowship application period open.

**1 August 2023:** Last date to receive applications.

**15 September 2023:** Announcement of the fellowships awards.

**2024 – Start of course** (and 3 months after the completion of the fellowship period, the final report must be submitted.)
